

Xian Lu

Assistant Professor
 Physics and Astronomy
 Clemson University
 Email: xianl@clemson.edu
 Phone: 864-656-4204

Xian Lu is an assistant professor in the Department of Physics and Astronomy at Clemson University. She has published more than 20 papers in peer-reviewed journals and proceeding and given more than 60 presentations at international conferences. She is the principal investigator (PI) and Co-I of 3 science projects funded by NSF and NASA and 1 project funded by Clemson. She has been frequently invited to serve as a reviewer for more than 10 renowned journals and as a judge for student posters at international conferences such as AGU and CEDAR. She is a frequent reviewer for the proposals submitted to NSF, NASA, and United States-Israel Binational Science Foundation (BSF). From November 2015 to January 2016, she was working at the McMurdo station, Antarctica on the operation and data collection of the Fe Boltzmann lidar. She has been advising graduate and undergraduate students on the study of atmospheric sciences and space physics since 2012. Her main research interests are atmospheric dynamics, wave dynamics and coupling, magnetosphere-ionosphere-thermosphere coupling, data analysis and numerical, and lidar technology.

A. Education

Ph.D.	University of Illinois at Urbana-Champaign	Atmospheric Sciences	2011
Master	Wuhan University, China	Space Physics	2006
B.S.	Wuhan University, China	Electrical Engineering	2003

B. Appointment

2016–present, Assistant Professor, Physics and Astronomy, Clemson University
 2012–16, Research Scientist & Postdoc Visiting Fellow (1 yr), University of Colorado Boulder
 2011–12, Postdoc Researcher, Embry-Riddle Aeronautical University
 2006–2011, Graduate Research Assistant, University of Illinois at Urbana-Champaign
 2010–2011, ASP Graduate Student Visitor, High Altitude Observatory, NCAR

C. Teaching Experiences

2013–2016, **Advisor** for two undergraduate students and **Co-Advisor** for one graduate student for wave analyses and atmospheric science study, CIRES, University of Colorado Boulder
 2008–2009, **Teaching assistant**, “*Severe and Hazardous Weather*”
 Department of Atmospheric Sciences, University of Illinois at Urbana-Champaign

D. Grants

- NASA Heliophysics Supporting Research (HSR) Award (**funded**, 2016–2017): **PI**, \$ 228,765
Title: Signatures of energy dissipation in the magnetosphere-ionosphere-thermosphere (MIT) Coupled system
- NSF CEDAR Award (**funded**, 2014–2017): **PI**, \$311,418

Title: CEDAR: Exploration of lower-atmosphere wave forcing, vertical wave coupling and their impacts on the ionosphere and thermosphere variability using WAM, lidar and ISR

- NSF Polar Program (**funded**, 2015–2019), **Co-PI**, \$ 329,725
Title: Collaborative Research: Antarctic Research: Characterizing Gravity Waves and their Effects on the Antarctic Ozone Layer
- NASA HSR Program (Pending, 2017–2020): **Co-PI**
Title: Storm-time Solar Wind Coupling with Polar Thermosphere-Ionosphere Fe/Fe+ (TIFe) Layers

F. Selective Conference Presentations

1. **Lu, X.**, X. Chu, C. Chen, W. Fong, T. Fuller-Rowell, W. Huang, J. A. Smith (2015), talk, Science lecture, McMurdo, Antarctica.
2. **Lu, X.**, H. Li, C. Chen, W. Huang, J. A. Smith, X. Chu, D. Pautet, T. Yuan, M. Taylor (2015), High to medium frequency mesoscale gravity waves over the central US using CRRL Na lidars and USU AMTM, invited talk, CEDAR, Seattle, WA.
3. **Lu, X.**, X. Chu, C. Chen, V. Nguyen (2015), Lidar, satellite and modeling studies of the baroclinic planetary waves from the stratosphere to the lower thermosphere in winter Antarctica, poster, CEDAR, Seattle, WA.
4. **Lu, X.**, C. Chen, W. Huang, J. A. Smith, X. Chu, T. Yuan, D. Pautet, M. Taylor (2015), A coordinated study of 1-h mesoscale gravity waves propagating from Logan to Boulder with CRRL Na Doppler lidars and temperature mapper, poster, CIRES Rendezvous, Boulder, CO.
5. **Lu, X.**, X. Chu, C. Chen, V. Nguyen (2015), Lidar and satellite studies of the vertical coupling of eastward propagating planetary waves with periods of 1-5 days from the stratosphere to the lower thermosphere in the winter Antarctic, 12th LPMR, Boulder, CO
6. H. Li, **Lu, X.**, C. Chen, W. Huang, J. Smith, X. Chu, D. Pautet, T. Yuan, M. J. Taylor (2015), Statistical study of high to medium frequency mesoscale gravity waves over the central US using CRRL Na lidars and temperature mapper, poster, CEDAR, Seattle, WA
7. Chen, C., X. Chu, J. Zhao, **X. Lu**, J. Smith, A. Dornbrack (2015), A correlation study on sources of inertia-gravity waves observed with lidar in the Antarctic middle and upper atmosphere at McMurdo, poster, AGU, San Francisco, CA.
8. Chen, C., X. Chu, W. Fong, **X. Lu** (2015), A statistical study of the 4-9 h waves in the Antarctic middle and upper atmosphere observed by lidar, 12th LPMR, Boulder, CO.
9. Chen, C., X. Chu, W. Fong, **X. Lu** (2015), A statistical study of the 4-9 h waves in the Antarctic middle and upper atmosphere observed by lidar, CEDAR, Seattle, WA.
10. Fong, W., X. Chu, **X. Lu**, Z. Yu, B. Roberts, C. Chen, J. Zhao, I. Barry, W. Huang, Z. Wang, T. Fuller-Rowell, A. D. Richmond, M. Codrescu, C. S. Gardner (2015), First climatology of temperature structure from 0 to 110 km during 2011-2014 and mechanism study of winter temperature tides of fast amplitude growth above 100 km at McMurdo (77.8S, 166.7E), Antarctica, CEDAR, Seattle, WA.
11. **Lu, X.**, C. Chen, W. Huang, J. Zhao, X. Chu, T. Yuan, D. Pautet, Y. Zhao, M. Taylor, C. Y. Cullens, J. Gong (2014). A coordinated study of 1-h mesoscale gravity wave propagating from Logan to Boulder, poster, AGU, San Francisco, CA.
12. Fong, W. C, X. Chu, **X. Lu**, C. Chen, Z. Yu, T. J. Fuller-Rowell, A. Richmond, M. Codrescu (2014), Joule Heating, Particle Precipitation and Dynamical Heating as Possible Tidal Sources in the Antarctic Winter Lower Thermosphere, poster, AGU, San Francisco, CA.
13. Huang, W, X. Chu, C. Gardner, J. D. Carrillo-Sanchez, W. Feng, J. M. C. Plane, D. Nesvorny, John A. Smith, **X. Lu**, W. Fong, Z. Yu, C. Chen and I. F. Barry (2014). Direct measurements of vertical Fe, Na and heat fluxes in the MLT by lidar at Boulder: Implications for the Velocity of Cosmic Dust Entering the Atmosphere, poster, AGU, San Francisco, CA.
14. Agner, R., A. Liu, J. Du, **X. Lu** (2014). Gravity Wave Effects On Short-Term Tidal Variability In WACCM/eCMAM, talk, AGU, San Francisco, CA.
15. Chu, X., Z. Yu, W. Fong, C. Chen, J. Zhao, W. Huang, X. Lu, T. J. Fuller-Rowell, A. D. Richmond, A. J. Gerrard, A. T. Weatherwax and C. S. Gardner (2014). Plasma-Neutral Coupling on the Dark and Bright Sides of Antarctica, talk, AGU, San Francisco, CA.

G. Awards and Fellowship

ISWA SCOSTEP/VarSITI Travel Support, (2016)
 ANGWIN Workshop Travel Support, (2013)
 CIRES Visiting Fellowship, University of Colorado at Boulder (2012–2013)
 Graduate Student Visiting Fellowship, Advanced Study Program, NCAR (2010-2011)
 Second Prize Scholarship & Endorsed Graduate Student, Wuhan University (2003)
 Second Prize Scholarship, Wuhan University (2002)
 Third Prize Scholarship, Wuhan University (2001)

H. Synergistic Activities

1. Paper reviewer (>40 times) for *Geophysical Research Letters*, *Journal of Atmospheric Sciences*, *Journal of Geophysical Research*, *Journal of Atmospheric and Solar-Terrestrial Physics*, *Annales Geophysicae*, *Radio Sciences*, *IET Science Measurement & Technology*, *Chinese Journal of Geophysics*, *Journal of Atmospheric and Oceanic Technology*, and *Studia Geophysica et Geodaetica*.

2. Proposal reviewer (~10 times) for *NSF, NASA and United States-Israel Binational Science Foundation (BSF)*
3. Poster Judge for *OSPA (Outstanding Student Paper Award), AGU (2012)*, San Francisco, CA
4. Judge for “*Lens on Climate Change film screening*” (2014), Boulder, CO
5. Judge for *Student Poster Competition* (2015), CEDAR Conference, Seattle, WA

I. Graduate and Undergraduate Students Supervised

Haoyu Li, Alan Sanchez, Dr. Weichun Fong

J. Collaborators and Advisors
